

BEYOND INNOVATION

NEW PRODUCT INITIATIVES FROM LENNOX

Lennox is proud to introduce the newest addition to the cooling product line-up, the 8 Series Multi-Zone Mini-Splits!

Lennox mini-split systems are a great solution to the challenge of localized heating or cooling needs. Because of their flexible design, the 8 Series is ideal when a traditional ducted system is too costly or too difficult to install. With efficiency levels of up to 16 SEER and super quiet operation, the 8 Series Mini-Splits continue the Lennox heritage of innovation.

Features / Benefits

- Sleek design – wall mount indoor design blends with any décor.
- Easy installation – requires NO ductwork or thermostat wire for quick and easy installs.
- Flexible installation – solves comfort issues that traditional units sometimes cannot.
- Greater flexibility - depending on the model, an outdoor unit can accommodate up to four indoor units.
- Inverter compressor – technology that delivers precise, efficient, and quiet comfort.
- Easy operation – remote control equipped with a sensor that measures the air temperature wherever you are in the room.
- Quiet comfort – low sound operation down to 56 dbA outdoors and 32 dbA indoors means your customers will not even hear it, enhancing their level of comfort.
- Outstanding energy savings – up to 16 SEER and 8.2 HSPF.
- AHRI rated and certified.
- Warranty – peace of mind with 5 year warranty**.
